PROFESSIONAL EXPERIENCE

DevsDenBD | Web Software Engineer

2022 - Present

- Collaborated with a team of developers in delivering scalable and optimized software solutions.
- Designed and implemented e-commerce and SaaS-based platforms using the MERN stack.
- Integrated secure APIs with JWT authentication for enhanced system reliability.
- Architected and maintained databases with MongoDB and PostgreSQL, ensuring high performance.
- Streamlined project workflows with Swagger documentation and agile practices.

PROJECTS

FlexiSpace (Meeting Room Booking System) | MERN Stack

Technologies: TypeScript, ReactJS, Redux, ExpressJS, Mongoose, JWT, Zod

- Built a fully functional platform for booking and managing meeting rooms in co-working spaces.
- Developed role-based authentication with JSON Web Token, enabling secure user and admin access.
- Designed and implemented user registration and login systems with form validation using Zod.
- Enabled users to book rooms with real-time availability checks and advanced search and filtering using MongoDB.
- Created an admin dashboard for managing bookings, including confirmation and cancellation workflows.
- Optimized API endpoints for faster response times, ensuring a seamless user experience.

Urban Mart (E-commerce Platform) | PERN Stack

Technologies: TypeScript, NextJS, ExpressJS, Prisma, JWT, Zod

- Created an optimized ER diagram to define relationships between users, products, orders, reviews, and categories.
- Designed and developed a responsive, SEO-friendly frontend using NextJS.
- Implemented role-based authentication for customers, vendors, and admins.
- Built features for:
 - Customers: Cart, order placement, secure payments, and product reviews.
 - Vendors: Shop creation, inventory management with history tracking, and reviews.
 - Admins: User management, shop blacklisting, category management, and platform monitoring.
- Configured a scalable backend with Prisma ORM and integrated secure payment gateways.

University Management System | MERN Stack

Technologies: TypeScript, ReactJS, Redux, ExpressJS, Mongoose, JWT, Zod

Telemedicine Platform | Backend

Technologies: TypeScript, ExpressJS, Prisma, WEB RTC (Agora.io), Cloudinary, JWT, Bcrypt, Zod

SKILLS

Frontend: ReactJS, NextJS, WebRTC, Firebase, NextAuth, Tailwind CSS, Ant Design, Shadcn, Material UI

Backend: NodeJS, ExpressJS, Prisma, Mongoose, Meilisearch

Database: MongoDB, PostgreSQL

State Management: Redux

Tools: Git, Postman, Swagger, Agile Methodology, Vercel, Netlify

Other Expertise: System Architecture, SEO Optimization
